PROJECT

- Project Title : **SUPER MARKET MANAGEMENT SYSTEM**
- Technologies Used : Java, MySQL, JDBC, Swing
- Objective : Developed an SuperMarket management system to improve flexibility of SuperMarket. Designed and implemented the overall architecture of the system. Utilized Java to build core functionalities such as managing product stock, processing sales transactions, generating bills, and updating inventory in real-time.

- Project Title : **CHESS GAME**
- Technologies Used : Java
- Objective : Developed a Chess Game with player vs player, designed to run on desktop platforms. Developed the Game Engine, handling move validation, turn management, and check/checkmate logic. Designed and built a user-friendly graphical interface using Java, enhancing the overall player experience.

- Project Title : **PRODUCT WEBSITE**
- Technologies Used : Html, CSS
- Objective : Developed a responsive product website using HTML and CSS to showcase a range of products in an interactive and visually appealing manner. It is optimized for both desktop and mobile devices to ensure seamless user experience across various screen sizes.
